

“

Kaneka has been using SHIMADZU instruments since the start of business in 1979 and WE HAVE NOT LOOKED AT OTHER VENDORS EVER SINCE. We have several SHIMADZU instruments such as FTIR, GC, HPLC, IR and UV-Vis Spectrophotometer, all of which are used for quality control testing. The instruments are easy to use and are able to perform the tests required by our customers from various parts of the world.

”

MS. JANET NGING
